EZLINER®

Proven, Reliable, Cost-Effective.

EZ Liner is where precision meets reliability. With a legacy steeped in expertise and a commitment to excellence, EZ Liner stands as a beacon in the industry, delivering **proven, reliable, and cost-effective** paint trucks and equipment. Backed by years of storied experience and unwavering knowledge, we take pride in crafting some of the most dependable and hardworking striping equipment available. No matter the market's demands, EZ Liner's extensive range of products is designed to tackle every job with simplicity, efficiency, and professionalism.

Stock Models

The ValuLiner Series offers reliable latex paint equipment with all the necessary features at an exceptionally cost-effective price.

Cascade 110 gallon capacity

- Small enough for most streets and roundabouts without sacrificing efficiency or performance
- Simple, reliable operation allows for quickly training new applicators
- Unparalleled pricing leads to a quick return-on-investment

Arapahoe 230 gallon capacity

- Agile without losing capacity or performance
- No CDL requirement to operate, providing flexibility for a team
- Versatile design for universal market appeal

Teton 500 gallon capacity

- Designed with the capacity for a full day's work – holding 500 gallons of paint and 3000 pounds of beads
- Teton is built for reliability and provides day after day of outstanding performance and output

Semi-Custom Configurations

The VersaLiner Series from EZ Liner start with our popular ValuLiner models and add the option to customize with some of our most requested upgrades; all pre-priced for quicker design and delivery.

Cascade Plus

The Cascade Plus begins on our base Cascade model and adds customizable options, allowing you to configure your equipment as needed while saving production time and money.

Arapahoe Plus

The Arapahoe Plus allows pre-configured customizable options to be added to the stock Arapahoe model. A great way to configure a non-CDL sized truck and ensure that it will match your unique needs.

Teton Plus

The Teton Plus is a mid-range, tote-draw striper that is versatile enough to be built with custom options without extended lead times using pre-engineered options and adding them to our base Teton model.

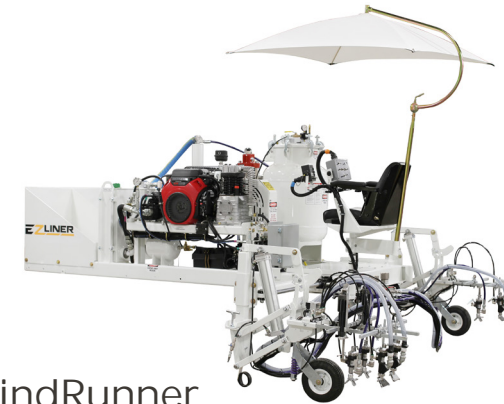

Customize your VersaLiner Truck with options from the following categories:

- Truck guidance
- Paint gun quantity and arrangement
- Third color option
- Paint heating system
- Paint gun actuators
- Safety and Work light packages
- Intercom communication
- Additional upgrades available

Specialty Equipment

Our products are proudly designed to provide customers with a great return on investment for all types of projects, from parking lots and temporary construction to major highways and airports. The custom-built approach provides customers the opportunity to design a truck specifically for any need. Equipment that encompasses safety, durability, and ease of use complete the job quick and “EZ” from start to finish.

WindRunner

Compact and versatile high capacity striper that maximizes investment by converting a flatbed or pickup into a profitable striper.

TrailRunner

Large capacity for self-propelled, small unit that's easy to use requiring only one operator.

EZ RPM Truck

Applicator truck for Raised Pavement Markers with two operator baskets, bituminous melter and gun, and deck storage for bituminous and markers.

Stencil Unit

Available as a palletized unit or truck mounted; paint, bead and applicator systems combined with storage for poly or aluminum stencils.

Custom Built Solutions

EZ Liner offers the widest range of custom-built, truck mounted latex paint stripers available today. Our custom-built approach means you will get the striper

that is designed for your needs and budget. Custom-built airless & air spray stripers for latex long line road and airport quick-dry markings.

Under 500 gallons

1000 + gallons

500 – 1000 gallons

Airport Trucks

Base Unit Specifications

- Utilization of components recognized and trusted as professional, durable, dependable and cost effective
- Engineering-generated weight-distribution layouts to ensure compliance with vehicle and legal limits
- High-quality welds and strong platform, railing and ladder construction
- Variety of paint-delivery systems, including airless and airspray technologies
- Simplified and convenient plumbing, wiring, and controls for ease of use and efficiency
- Guiding tools options such as highlift mechanical, laser and video camera
- Surface-preparation air jets and electric gun actuators for line-width control
- Resourceful paint and bead loading systems and level gauges
- Agitators and recirculation for maintaining viscosity and integrity of the paint
- Tank, tote and drum draw paint systems
- Communication tools such as wireless, duplex, simultaneous-talk intercom systems
- LED safety lighting to include strobes, arrow and message boards, light bars, and work light packages
- Intelligent and safe design, dependable performance, and reliable service after the sale

Custom Developed Results

Developing and manufacturing truly purpose-built equipment, inspired by customer request and inspiration, is our motivation.

Arrow is your trusted partner in pavement marking excellence. Arrow has a longstanding legacy of providing top-of-the-line, **rugged, road-tested, and purpose-built** equipment. Each product in the catalog is a testament to delivering world-class solutions, custom-designed and manufactured to meet the needs and performance requirements of our clients. With innovation at our core, Arrow consistently pushes the boundaries, ensuring that our customers receive not just products but purpose-built solutions that redefine pavement marking standards.

Whether it be building equipment that is entirely new or reapplying different technologies from other industries, we strive to innovate to improve up-time and productivity.

Custom Pre-Melter Trailer

Thermoplastic pre-melter trailer built to customer specifications and state regulations to keep crews moving.

Center Deck Operator Truck

Designed with the operator station in the center of the deck and cart between the front and rear axles for ease of operation and control around tight turns and when painting a radius.

Dual Broom Truck

Custom truck built with broom on front and right side built to sweep a double lane of traffic in one pass.
